

## EE Reading Log

Use this form to document your background reading hours. Remember that you are required to read 5-10 hours. You must show a variety of sources such as books, chapters, journals, magazines, etc.

The “Comments” section of this document will be immensely helpful to you later during the research process when you may want to revisit some of the sources you have encountered. Consider the following: What does the source cover specifically? Is there a valuable study referenced? Can you use the source later? Did it include a helpful bibliography? If you believe that you will go back to this source for your research, go ahead and copy it now, including the publication information.

Be prepared to discuss your background reading with your supervisor and have him/her initial it at your January meeting(s).
